WORK EXPERIENCE

Applied AI Engineering Intern, QuantiFire Ltd - London, UK

May 2026 - Present

- Built an investor-relations agent over filings, surveys and shareholder data that picks one of 4 retrieval methods per question.
- Designed its checks so every figure comes from SQL and matches source, so the agent refuses rather than guesses (700+ tests).
- Delivered 7 weeks ahead of a 14-week plan, adding 8 independent checks (5 AI judges, 3 rule-based vetoes) to every answer.

Data Analyst (Part-time, Remote), APJ Kapital - London, UK

Sep 2023 - May 2026

- Wrote the research notes behind the desk's buy, hold and sell decisions on 30+ stocks, from filings, earnings calls and news.
- Built the PostgreSQL pipelines and Tableau dashboards the desk used weekly for P&L, sector allocation and factor exposure.
- Automated the daily market digest in n8n, turning Discord market videos into Whisper transcripts and GPT-4o summaries.
- Built a 7-page React and TypeScript website prototype for the firm, covering strategy, performance, research and team.

AI Investment Programming Intern, MDOTM - Milan, Italy

May 2022 - Oct 2022

- Built investment tools and customer-segmentation models in Python and R, owning data prep through to modelling.
- Cleaned data for an ML forecasting tool in the 40-person team whose platform won 2 awards in 2022 (AIFIN, NY FinTech).

PROJECTS

PipelinePulse | SQL, DuckDB, Python, GitLab CI/CD, Kiro, DORA

2026

Tracks how fast and reliably a team ships code across 436k GitLab CI jobs. Its alerts caught all 14 planted slowdowns, 0 false alarms.

Stratum Analytics | Tableau, SQL, Python, DuckDB, VaR

2026

Tableau reporting suite for a simulated €755m family office. Its checks caught all 16 planted errors in 9,373 trades, 0 false alarms.

Longstop | Python, SQL, SEC EDGAR, merger modelling

2026

Built a dataset of 10,051 US mergers from SEC filings. Of 437 filings that looked like failed deals, 216 were unrelated contracts.

Churn Propensity Modelling | Python, scikit-learn, XGBoost

2026

Churn model on 7,043 telecom customers. Targeting the riskiest 20% reaches 55% of those about to leave, 2.7x better than at random.

ProcessLab | JavaScript, process mapping, business case

2026

Costed automating part of a fictional insurer's claims process, freeing 1,070 staff hours a month with a 5.4-month payback.

VendorBoard | JavaScript, weighted decision analysis, stakeholders

2026

Scores 3 suppliers under 4 stakeholder views. Finance's view changes the winner, and a UK data-residency rule knocks out 1 of the 3.

SignalOps | Python, dbt, FastAPI, A/B testing

2026

Incident alerting where 88% of alerts were real incidents, vs 12% for a standard statistical rule, cutting false alarms from 111 to 4.

Community Topic Discovery | Python, gensim, scikit-learn, NLP

2026

Grouped ~14,000 forum posts into 17 topics (LDA, 2x the coherence of NMF) and ranked them by urgency for moderators.

Calibration-Optimised Equity Outperformance | Python, XGBoost, LightGBM, SHAP

2026

Tested if better-calibrated models pick better stocks (457 S&P 500 names). Returned 68.1% over 2021-24, ahead of the index's 66.1%.

RiskTerrain | Python, LangGraph, SurrealDB, Docker

2026

Hackathon tool that traces supply chains across 154 S&P 500 firms to score knock-on risk from world events in under 8 seconds.

Touchstone | Python, FastAPI, RAG, Azure architecture

2026

AI assistant design for a regulated firm that never states an unverified number. It blocked 59 of 59 attempts to sneak one in.

TECHNICAL SKILLS

Analysis and ML. SQL (PostgreSQL, DuckDB), Python (pandas, scikit-learn, XGBoost, PyTorch), R, Excel, A/B testing, forecasting

BI, engineering and AI. Tableau, Power BI, dbt, Docker, pytest, GitLab CI, GitHub Actions, n8n, Kiro, LangChain, RAG, GPT-4o

EDUCATION

MSc Business Analytics, UCL

Sep 2025 - Present

Predicted Distinction (72%). Modules include Predictive Analytics, Statistical Foundations, Operations Analytics and NLP.

BSc Business Analytics (Minor: Accounting & Finance), Lancaster University

Sep 2021 - Jul 2025

Upper Second-Class Honours (2:1), four-year programme. Modules include Data Mining, Database Systems and Decision Analysis.

INTERESTS

Italian (native), English (native), Spanish (fluent), German (beginner) · Mathematics and computer science tutoring from GCSE to GMAT, volunteering at a Milan rescue-dog kennel
